presents an Autumn lecture series exploring

yellowstone to yukon freedom to roam

Tuesday Evenings, October 9 through December 4, 2007

UNIVERSITY OF WASHINGTON
Program on the Environment

presents an Autumn lecture series exploring

yellowstone to yukon freedom to roam

Tuesday Evenings, October 9 through December 4, 2007

UNIVERSITY OF WASHINGTON

Program on the Environment

What: **8-part lecture series**

When: **Tuesdays, 7-8:30 pm, October 9 - December 4, 2007**

Where: **Burke Museum, University of Washington, Seattle campus**

Who: **YOU**

Cost: **Free!**

The **Yellowstone to Yukon** region, stretching across the northern mountain backbone of North America, is a wild land where grizzly bears roam, where wolves howl and salmon and trout run in clear, cold streams. The proposed Yellowstone to Yukon corridor aims to maintain the great diversity of this region by connecting the public lands of this expanse through an array of conservation efforts. This fall, join the University of Washington and the Burke Museum as we host an 8-part lecture series to explore the science, politics, people and ethics behind this vision. Each Tuesday evening, invited speakers will share their perspective on the the possibilities and the challenges of the Y2Y. *Photographs by Florian Schulz.*

For more information and to register, contact Michelle Hall at hallm@u.washington.edu or 206.616.1208, or visit www.courses.washington.edu/y2y

For disability accommodations, please call: 206-543-6450 (voice), 206-543-6452 (tty), 206-685-7264 (fax) or email dso@u.washington.edu
